

Virtual Commissioning

Case Study: Retail Store

The customized, no-cost Virtual Commissioning Program™ (VCx™) helped this retail store save **91,646 kWh** and **\$9,330** on their annual energy bill!

91,646 kWh
in annual energy savings

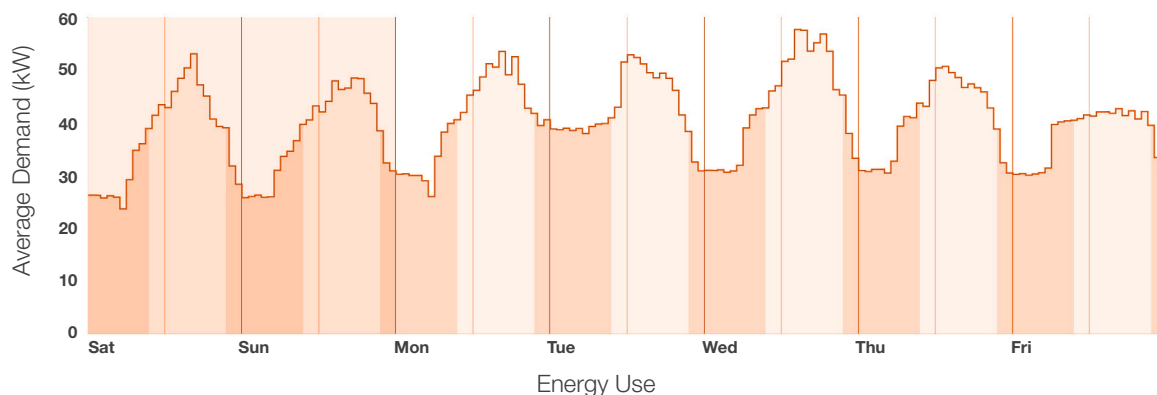

\$9,330
in avoided annual energy costs

68 tons
of emissions avoided

Pre-Engagement: Evaluating the Site

An Energy Advisor's initial review of the store's energy data revealed high overnight energy use when the building was vacant.

Post-Implementation: Creating Energy Savings

Recommendations included adjusting the lighting schedule to align closely with the building's operating hours.
