

Building Decarbonization Transform Your Building. Reduce Emissions. Save Energy.

Jersey Central
Power & Light
A FirstEnergy Company

Building decarbonization helps commercial and industrial customers move away from fossil-fueled equipment and embrace highly efficient electric technologies. By electrifying building systems, you can improve performance, lower emissions and prepare your facility for a cleaner, more resilient energy future.

Participation Requirements

- ✓ Pre-site inspection to confirm fossil fuel replacements
- ✓ Fossil fuel systems must be replaced and decommissioned; if the systems are retained as back-up, integrated controls must be installed
- ✓ Provide documentation of existing equipment and conditions

Get up to **\$5,500/ton** in incentives!

- Air Source Heat Pumps
- Variable Refrigerant Flow Heat Pumps
- Water and Ground Source Heat Pumps
- Water Heating

Additionally, get up to **\$6,500**
for wiring upgrades!
